Part I

Advances in Human Factors and Ergonomics 2014

5th International Conference on Applied Human Factors and Ergonomics

20 Volume Set: Proceedings of the 5th AHFE Conference 19-23 July 2014

<i>Advances in The Human Side of Service Engineering</i>	<i>Louis Freund and Wojciech Cellary</i>
<i>Advances in Human Factors and Sustainable Infrastructure</i>	<i>Jerzy Charytonowicz</i>
<i>Advances in Human Aspects of Healthcare</i>	<i>Vincent Duffy and Nancy Lightner</i>
<i>Advances in Applied Digital Human Modeling</i>	<i>Vincent Duffy</i>
<i>Advances in Cross-Cultural Decision Making</i>	<i>Sae Schatz, Joseph Cohn and Denise Nicholson</i>
<i>Advances in Human Factors, Software, and Systems Engineering</i>	<i>Ben Amaba and Brian Dalgetty</i>
<i>Advances in Human Aspects of Transportation (Part I, II, III)</i>	<i>Neville Stanton, Steve Landry Giuseppe Di Bucchianico and Andrea Vallicelli</i>
<i>Advances in Safety Management and Human Factors</i>	<i>Pedro Arezes and Paulo Carvalho</i>
<i>Advances in Cognitive Engineering and Neuroergonomics</i>	<i>Kay Stanney and Kelly Hale</i>
<i>Advances in Social and Organizational Factors</i>	<i>Peter Vink</i>
<i>Advances in The Ergonomics in Manufacturing: Managing the Enterprise of the Future</i>	<i>Stefan Trzcielinski and Waldemar Karwowski</i>
<i>Advances in Physical Ergonomics and Human Factors (Part I, II)</i>	<i>Tareq Ahram and Renliu Jang</i>
<i>Advances in Ergonomics In Design, Usability & Special Populations (Part I, II, III)</i>	<i>Marcelo Soares and Francisco Rebelo</i>
<i>Advances in Affective and Pleasurable Design</i>	<i>Yong Gu Ji and Sooshin Choi</i>
<i>Advances in Science, Technology, Higher Education and Society in the Conceptual Age: STHESCA</i>	<i>Tadeusz Marek</i>

Table of Contents

Section 1: Aviation - Human Factors Issues in Air Transportation, Aviation Safety and Risk Analysis

Extracting cultural factors from helicopter accident reports using content analysis H. Omole, G. Walker and G. Netto, UK	3
A qualitative exploration of critical incidents: Expanding Neisser's Perceptual Cycle Model K. Plant and N. Stanton, UK	15
Human factors engineering at the transportation security administration B. Kudrick and F. Greene, USA	25
Investigating time pressure for the empirical risk analysis of sociotechnical systems in ATM L. Meyer, K. Gaunitz and H. Fricke, Germany	33
Biodynamic adverse rotorcraft-pilot coupling G. Quaranta, P. Masarati, M. Lanz, M. Marforio and V. Muscarello, Italy	46
Aviation safety: An initial exploration of the feasibility of using language engineering technologies for reducing pilot-air traffic control miscommunications B. Bajaj and A. Majumdar, UK	56
Airspace infringements in European airspace E. Psyllou, A. Majumdar and W. Ochieng, UK	68
Health related factors in traffic accident investigation R. Rimstad and A. Lindstad, Norway	80

Section 2: Aviation - Human Factors Issues in Air Traffic Management I

Flight deck crew experiences flying profile descents during metering operations L. Martin, S. Sharma, J. Kaneshige and S. Lozito, USA	89
Understanding the human factors limitations of automated conflict resolution through air traffic controller solicitation C. Surakitbanharn, A.-Q. Dao, S. Landry and N. Minato, Japan/USA	102

System modeling to identify agent functions in complex human-integrated systems: An application to air transportation S. Landry, USA	109
How pilots assess their non-technical performance – a flight simulator study P. Gontar, H.-J. Hoermann, J. Deischl and A. Haslbeck, Germany	119
Section 3: Maritime - Design Tools and Methods	
The visual pleasantness in yacht design: Natural lighting, views and interior colors M. Di Nicolantonio, G. Di Bucchianico and S. Camplone, Italy	129
Assessing the fitness of information supply and demand during user interface design C. Denker, F. Fortmann, M. Ostendorp and A. Hahn, Germany	140
Classic Yacht Redesign and Restoration: Ergonomic and operational aspects M. Morozzo della Rocca, Italy	150
Human Factors in the Design of Naval Vessels M. Zignego, Italy	162
Chemical hazard in FRP pleasure boats' manufacturing R. Frassine, C. Fusaro and A. Ratti, Italy	171
Section 4: Maritime - Communication and Cognitive Performances	
Voice and text messaging in ship communication T. Porathe, P. Eklund and H. Goransson, Sweden	183
Using eye-tracking data and mouse cursor location to examine visual alerting in a multi-display environment J. Crebolder and J. Salmon, Canada	192
Concept for the integration of information received via communication equipment with onboard navigational systems E. Holder, Germany, F. Motz, Germany, H. Horoufchin, Germany, and M. Baldauf, Sweden	203
The impact of motion induced interruptions on cognitive performance A. Hunter, N. Bourgeois and R. Langlois, Canada	215
On common ground at sea: The proactive negotiation for channel navigation A. Kataria and G. Praetorius, Sweden	222

Seeking harmony in shore-based unmanned ship handling – From the perspective of human factors, what is the difference we need to focus on from being onboard to onshore? Y. Man, M. Lundh and T. Porathe, Sweden	231
Characteristics of dynamic positioning operators' situation awareness and decision making during critical incidents in maritime operations K. Overgard, L. Soerensen, T. Martinsen and S. Nazir, Norway/Italy	240
Section 5: Road and Rail - Road Infrastructure, Design and Safety	
Safety concerns regarding merging in tunnels - A simulator study R. Ceci, Sweden, K. Young, Australia, C. Patten, Sweden and M. Lenne, Australia	255
A simulator evaluation of driver responses to dynamic warning signs at rural intersections A. Stephens, E. Mitsopoulos-Rubens, N. Candappa, M. Lenne and V. Beanland, Australia	266
Driver behaviour at roadworks G. Walker and M. Calvert, UK	275
Development and evaluation of a rural intersection active warning system H. Mackie, C. Brodie, K. Holst, F. Tate and R. Scott, New Zealand	286
Redesigning existing urban streets to optimize multiple outcomes H. Mackie, New Zealand	295
An investigation of motorist behavior in Taiwan C.-Y. Huang, Taiwan	303
Real or imagined? A study exploring the existence of common method variance effects in road safety research P. Barraclough, A. af Wahlberg, J. Freeman, J. Davey and B. Watson, Australia	313
Section 6: Road and Rail - System Design and Evaluation I	
Evaluation of and design implications for force-sensitive touch input devices L. Diwischek and S. Essers, Germany, and J. Lisseman, USA	327
Better vehicle design for all S. Karali, D. Gyi and N. Mansfield, UK	337

Pedestrian navigation guidance for elderly people's safe and easy wayfinding H. Furukawa, Japan	344
Seat design parameters for an elevated driving posture J. Smith, N. Mansfield and D.Gyi, UK	357
Information fusion for driver distraction studies using eye tracking glasses L. Paletta, M. Schwarz, C. Wollendorfer and R. Perko, Austria	364
Section 7: Aviation - Recent Methodological Developments and Results from Psychophysiology in Ergonomics (PIE)	
Some challenges in the design of human-automation interaction for safety-critical systems M. Feary and E. Roth, USA	375
Methodological issues of pilots' performance assessment I. Bukhtiyarov, K. Kallus, E. Osokina and C. Talker, Russia/Austria	386
Detection of a decrease in concentration using indices derived from heart rate and respiration toward affective human-robot interaction M. Ohsuga and H. Boutani, Japan	393
Heart rate variability as a mental workload index S. Miyake, H. Kuraoka and C. Wada, Japan	399
VOD-CA - Testing a Velocity-Obstacle based Display for Collision Avoidance in aviation U. Nagler, P. Manske, P. Sachse, M. Nitzschner, M. Martini and M. Furtner, Austria/Germany	405
How to involve psychophysiology in the field of transportation: Recent contributions to an applied psychophysics problem V. Wagner and K. Kallus, Austria	413
Section 8: Road and Rail - Highly Automated Driving - Aspects of Driver Vehicle Interaction I	
Comparing the perception of critical longitudinal distances between dynamic driving simulation, test track and vehicle in the loop C. Purucker, F. Ruger, N. Schneider, A. Neukum and B. Farber, Germany	421
The effect of urgency of take-over requests during highly automated driving under distraction conditions F. Naujoks, C. Mai and A. Neukum, Germany	431

Mediating the interaction between human and automation during the arbitration processes in cooperative guidance and control of highly automated vehicles: Basic concept and first study M. Baltzer, E. Altendorf, S. Meier and F. Flemisch, Germany	439
Transition of control: Automation giving back control to the driver D. Willemsen, A. Stuiver and J. Hogema, The Netherlands	451
Influence of expertise on the judgment of controllability of advanced driver assistance systems P. Galaske, M. Farid and K. Bengler, Germany	460
 Section 9: Road and Rail - Human Factors at Level Crossings	
Evaluating an advance warning sign for level crossings D. Basacik, S. Cynk, T. Flint and J. McMorrow, UK	471
Drivers' visual scanning and head check behavior on approach to urban rail level crossings K. Young, M. Lenne, V. Beanland, P. Salmon and N. Stanton, Australia/UK	482
How well do people understand the signs and signals at user-worked level crossings? S. Cynk, T. Flint and J. McMorrow, UK	491
Improving the railway's understanding of accident causation through an integrated approach to human factors analysis and technical safety data recording C. Wullems, G. Dell and Y. Toft, Australia	501
Evaluating design hypotheses for rail level crossings: An observational study of pedestrian and cyclist behavior G. Read, P. Salmon, M. Lenne and E. Grey, Australia	512
 Section 10: Road and Rail - Risk and Driving	
Being "always on" in vehicles – The use of apps while driving bears risks B. Franz, I. Zoller, M. Kauer, L. Schulz, B. Abendroth and R. Bruder, Germany	527
Analysis of factors associated with speeding among road users in Malaysia N. Isah and N. Fadilah Mohd Soid, Malaysia	536
Comparing road users with high and low perceived risk of being caught for traffic infringement in Malaysia N. Soid and N. Isah, Malaysia	544

A review of international speed enforcement policies and practices: Evidence-based recommendations for best practice D. Soole, B. Watson and J. Fleiter, Australia	553
The effect of communicational signals on drivers' emotion states Y. Ba, W. Zhang and G. Salvendy, China	567
Testing the cognitive load of gesture interaction on drivers when performing tertiary tasks X. Wu and Y. M. Choi, USA	575

Preface

Human Factors and Ergonomics have made a considerable contribution to the research, design, development, operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure, aviation and maritime transportation. This book presents recent advances in the Human Factors aspects of Transportation. These advances include accident analysis, automation of vehicles, comfort, distraction of drivers (understanding of distraction and how to avoid it), environmental concerns, in-vehicle systems design, intelligent transport systems, methodological developments, new systems and technology, observational and case studies, safety, situation awareness, skill development and training, warnings and workload.

This book brings together the most recent human factors work in the transportation domain, including empirical research, human performance and other types of modeling, analysis, and development. The issues facing engineers, scientists, and other practitioners of human factors in transportation research are becoming more challenging and more critical.

The common theme across these sections is that they deal with the intersection of the human and the system. Moreover, many of the chapter topics cross section boundaries, for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool. This is in keeping with the systemic nature of the problems facing human factors experts in rail and road, aviation and maritime research– it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment, but as embedded issues that can only be understood as a part of an overall system.

In keeping with a system that is vast in its scope and reach, the chapters in this book cover a wide range of topics. The chapters are organized into 30 sections over three volumes.

Part I:

Section 1: Aviation - Human Factors Issues in Air Transportation, Aviation Safety and Risk Analysis

Section 2: Aviation - Human Factors Issues in Air Traffic Management I

Section 3: Maritime - Design Tools and Methods

Section 4: Maritime - Communication and Cognitive Performances

Section 5: Road and Rail - Road Infrastructure, Design and Safety

Section 6: Road and Rail - System Design and Evaluation I

Section 7: Aviation - Recent Methodological Developments and Results from Psychophysiology in Ergonomics (PIE)

Section 8: Road and Rail - Highly Automated Driving - Aspects of Driver Vehicle Interaction I

Section 9: Road and Rail - Human Factors at Level Crossings

Section 10: Road and Rail - Risk and Driving

Part II:

Section 11: Road and Rail - Driver State Detection and Simulated Driving: Drawbacks and Opportunities

Section 12: Road and Rail - Highly Automated Driving -Aspects of Driver Vehicle Interaction II

Section 13: Road and Rail - Human Mobility Increase as a Key Element in Designing Innovative Transportation Systems

Section 14: Road and Rail - Perception and Control Issues in the Design of Advanced Driving Assistance Systems

Section 15: Road and Rail - Transport Data and Analysis

Section 16: Road and Rail - Systems Thinking in Road and Rail Transport

Section 17: Road and Rail - Electric Vehicles: New Challenges for Human Machine Interaction

Section 18: Road and Rail - System Design and Evaluation II

Section 19: Road and Rail - Driver Distraction and Inattention

Section 20: Aviation - Human Factors Issues in Air Traffic Management II

Section 21: Aviation - Human Factors Issues in Air Traffic Management III

Part III:

Section 22: Maritime - Human Diversity

Section 23: Maritime - Training and Work Simulations

Section 24: Road and Rail - Eco-Driving, Public Transport and Pedestrians

Section 25: Road and Rail - Human Factors in Rail Systems

Section 26: Road and Rail - Accident Analysis and Prevention

Section 27: Road and Rail - Individual Differences in Driving

Section 28: Road and Rail - Human Factors in Rail and RLX

Section 29: Road and Rail - System Design and Evaluation III

Section 30: Road and Rail - Naturalistic and Simulator HF Driving Communities

This book will be of interest and use to transportation professionals who work in the road and rail, aviation and maritime domains as it reflects some of the latest Human Factors and Ergonomics thinking and practice. It should also be of interest to students and researchers in these fields, to help stimulate research questions and ideas. It is my hope that the ideas and studies reported within this book will help to produce safer, more efficient and effective transportation systems in the future.

We are grateful to the Scientific Advisory Board which has helped elicit the contributions and develop the themes in the book. These people are academic leaders in their respective fields, and their help is very much appreciated, especially as they gave their time freely to the project.
